"PLAYING TRAINS" W

A BIG START WITH THE SMALL TRAIN.

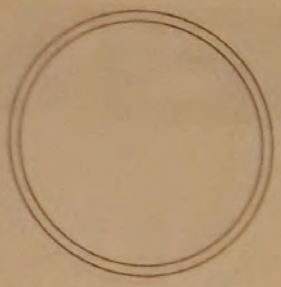
A "00" scale LIMA train set allows you to build a realistic layout in a small area which can then be extended by choosing from a wide range of accessories which are available.
A LIMA train set is an ideal way to begin the hobby of "PLAYING WITH TRAINS" whether your preference is for a freight set or a passenger set, steam or modern diesel LIMA can satisfy all your wishes.
The electric train is ready to run on the track of your dreams, allowing you to build numerous shaped layouts recreating the fascination of a signalman controlling a busy main - line station, shunting large freight trains back and forth and allowing the Inter-city Express train to speed through on its journey, the only limit is your imagination...
A world for you - only for you.

Soon you will wish to sta

ITH LIMA TRAIN SETS

The LIMA range is the largest available, with a host of accessories offering unlimited possibilities of extending and completing one's layout. One or more accessories will give a touch of realism and make your railway come alive: transforming your railway layout into a perfect and complete miniature world of model railways.

art playing trains...



Starting from a basic track layout supplied with each Lima train set you can gradually extend your layout. Manual operated points are included in the track accessory packs A, B and C.

Supertraction.
Lima have always striven towards realism in model railways. Now for life-like speeds we offer you a choice of two power plants, based on our famous G motor.
"Supertraction" is a low-ratio gearing, faithfully reproducing acceleration from a slow crawl to scale maximum speed.
"Supertraction" also gives you greater pulling power, trasmitting energy more efficiently through the axles so that even steep gradients can be tackled at a steady climb.

High-speed.
"High-speed" higher-ratio gearing is also available and is most suitable for locomotives renowned for their crack express speeds. Trust Lima to get as near as possible to the real thing! Both motors feature self-lubricating gears that require no maintenance, and of course they both meet our standards of low noise and anti-interference on T.V.'s and radios.

Ask for the catalogue "LIMA RAILWAYS" you can find other models of locomotives all faithful to the original model.

205117MG 0-6-0 T 94xx Class Tank Locomotive. Original GWR Livery.
